Lab : Book a Dummy Flight Ticket

Objective: Automate the complete Dummy Ticket Booking workflow. Create reusable date picker helper functions to handle Date of Birth, Departure Date, and Return Date selections dynamically.

Application Under Test

URL: https://www.dummyticket.com/dummy-ticket-for-visa-application/

Business Scenario

A customer wants to purchase a dummy flight ticket for visa application purposes. The user should be able to:

- Select a dummy ticket product
- Enter passenger details
- Select Date of Birth
- Choose a round-trip journey
- Select departure and return dates
- Enter billing and contact information
- Verify order summary details
- Place the order
- Reach the payment page successfully

Reusable Functions to Implement

Function 1: selectDate()

Create a generic reusable function that:

- Opens the date picker
- Selects Year
- Selects Month
- Selects Day
- Works for any date field

Parameters

Parameter	Description
page	Playwright Page object
dateInputSelector	Date field locator
targetDate	Date to be selected

Function 2: selectDateOfBirth()

Create a specialized wrapper function for selecting Date of Birth.

Parameters

Parameter	Description
page	Playwright Page object
birthDate	DOB to be selected

Function 3: selectTravelDate()

Create a specialized wrapper function for selecting:

- Departure Date
- Return Date

Parameters

Parameter	Description
page	Playwright Page object
dateInputSelector	Travel date field
travelDate	Date to be selected

End-to-End Test Case

Test Case ID

E2E_DUMMY_001

Test Case Title

Book a Dummy Flight Ticket Successfully

Test Data

Field	Value
First Name	John
Last Name	Smith
DOB	15-Jan-1995
Gender	Male
Travel Type	Round Trip
From City	Hyderabad
To City	London
Billing Name	John Smith
Phone	9876543210
Email	john.smith@test.com
Country	India
State	Telangana
Address	Hitech City, Hyderabad
City	Hyderabad
Postal Code	500081

Test Steps

https://www.pavanonlinetrainings.com https://www.youtube.com/@sdetpavan

Step 1: Open Application

1. Launch browser.
2. Navigate to Dummy Ticket application.
3. Verify page title.
4. Verify Place Order button is visible.

Expected Result

- Application loads successfully.

Step 2: Select Product

1. Select "Dummy Ticket for Visa Application".
2. Verify checkbox is selected.

Expected Result

- Product is selected successfully.

Step 3: Enter Passenger Details

1. Enter First Name.
2. Enter Last Name.
3. Select Date of Birth using helper method.
4. Select Gender.

Expected Result

- Passenger information is entered successfully.

Step 4: Enter Travel Details

1. Select Round Trip.
2. Enter Departure City.
3. Enter Destination City.
4. Select Departure Date using helper method.
5. Select Return Date using helper method.

Expected Result

- Travel information is entered successfully.

Step 5: Enter Billing Information

1. Enter Billing Name.
2. Enter Phone Number.
3. Enter Email.
4. Select Country.
5. Select State.
6. Enter Address.
7. Enter City.
8. Enter Postal Code.

Expected Result

- Billing details are accepted successfully.

Step 6: Validate Entered Information

Verify:

- Billing Name
- Phone Number
- Email
- Country
- State
- Address
- City
- Postal Code

Expected Result

- All entered values match expected values.

Step 7: Validate Order Summary

Verify:

- Product Name = Dummy ticket for Visa Application
- Product Price = ₹1,200

Expected Result

- Correct product information is displayed.

Step 8: Place Order

1. Verify Place Order button is enabled.
2. Click Place Order.

Expected Result

- Order submission starts successfully.

Step 9: Verify Payment Page

Verify:

- Payment Page title is displayed.

Expected Result

- User reaches the Payment Page successfully.
