Web Table with CRUD Validation

Application Used: Auto Play URL: https://sdetqa.vercel.app/autoplay.html

Test Step	Expected Result
1. Open the CRUD Web Table page.	The page opens successfully and the **Web Table with CRUD** section is displayed.
2. Verify the CRUD table is displayed.	The table is visible with the headers **#, Name, Role, Action**.
3. Verify the input fields and buttons.	**Name**, **Role**, **Add**, **+ Dynamic**, and **Search** fields are visible and enabled.
4. Verify the default table data.	The table contains two records: **Alice** and **Bob**.
5. Enter **Sam Tester** as Name and **QA Lead** as Role. Click **Add**.	A new row for **Sam Tester** with role **QA Lead** is added to the table.
6. Verify the total number of rows.	The table now contains **3 rows**.
7. Search for **Alice** in the search box.	Only the **Alice** record is visible, and other rows are hidden.
8. Clear the search box.	All table rows become visible again.
9. Delete the **Bob** record by clicking **Delete** and accept the confirmation dialog.	The **Bob** record is removed from the table and the total row count decreases to **2**.
10. Click the **+ Dynamic** button.	A new dynamic record is added to the table with values such as **New** and **Dev**, confirming the button works successfully.
